

✓ **Done:** Receive a grade

Due: Monday, 12 January 2026, 11:55 PM

This is the second summative assessment for this module and accounts for 30% of your final module mark. Submit by end of Unit 10.

Assignment Brief

The research proposal presentation fulfils the learning outcomes where you will evaluate critically existing literature, research design and methodology for your chosen topic, including data analysis processes and so produce and evaluate critically a research proposal for your chosen topic. This can be based on the literature review topic you chose in Unit 1 or the topic of your capstone project for MSc Students (**MSc students - Please see the BCS Project Requirements document on the Module Resources page and also the [CyBOK Knowledge Base](#) for those taking on Cyber Security Projects as your Cyber Security project should fall into one of these CyBOK Knowledge Areas, as well as meeting BCS requirements**).

You are required to create an audio-narrated slide presentation and a transcript in which you will present the following sections. These sections are required in a standard research proposal for the Computing department. You are free to combine/merge sections, where appropriate and without detriment to the structure of your presentation.

- Project Title.
- Significance/Contribution to the discipline/Research Problem.
- Research Question.
- Aims and Objectives.
- Key literature related to the project.
- Methodology/Development strategy/Research Design.
- Ethical considerations and risk assessment (as part of your ethical approval application).
- Description of artefact(s) that will be created (if applicable).
- Timeline of proposed activities.

The research proposal presentation fulfils the learning outcomes where you will evaluate critically existing literature, research design and methodology for your chosen topic, including data analysis processes and so produce and evaluate critically a research proposal for your chosen topic. This can be based on the literature review topic you chose in Unit 1 or the topic of your capstone project (MSc students).

Instructions

For this assignment, you are required to record a **15-minute presentation**, along with a transcript of the audio file. The presentation slides should not be wordy or repeat verbatim the oral presentation. Visuals, illustration, statistics, charts, tables and indication of key pointers are welcome. In assessing the presentation for marking, emphasis will be placed on the oral content. However, clarity of the visual presentation will also be taken into account.

It is strongly recommended that, in order to record your presentation, you use a headset with a microphone.

There is no word count for the slide presentation, and there is no fixed word count for the oral presentation/transcript. However, note that an average speech rate for a comfortable and clearly orally paced presentation is about 100-150 words per minute. Given that your presentation should be about 15 minutes, you can work against a minimum of 1500 to a maximum of 2250 words in your oral presentation/transcript.

Before submitting the work, consider the following checklist in conjunction with the applicable grading criteria (see the Module Resources page):

Knowledge and Understanding weighted 25%, Use of relevant sources weighted at 5%:

- Are the major points identified?
- Are the details presented clearly?

Chat to us!

Criticality weighted at 25%, Use of relevant sources weighted at 5%:

- Is there a critical discussion/analysis of your methodology/design?

Structure and Presentation weighted at 10%:

- Is the presentation well organised?

Presentation and Communication Skills weighted at 30%:

- Is the presentation clearly introduced and concluded?
- Is the presentation well-paced and timed?
- Is the information presented clearly and concisely?
- Is the presentation style lively, fluent and engaging?

Slide Presentation & Audio Guidance

Slide Presentation Guidance

If you do not have access to PowerPoint, you may use Google Slides, which is a free cloud-based and multiplatform slide presentation application that you can use on most modern web browsers. If you are an Apple Mac user, you may also use Keynote which is pre-installed on all Apple Mac Laptops and PC's. If you do make use of either of these applications, please make sure to save your presentation in PowerPoint format.

How to save your presentation in the PowerPoint format:

- [Apple Keynote](#)
- [Google Slides](#)

Audio Guidance

If you have access to PowerPoint, you can record your narration directly onto your presentation slide. If you do not have access to PowerPoint and you are using an alternative slide presentation application, we recommend that you record your narration separately and upload this file as an additional attachment. You can use an online application called Online Voice Recorder to record your audio. Read guidance on how to use the [Online Voice Recorder](#) before starting.

Please ensure that your citations and list of references are included in the slides and citations mentioned in your transcript.

Please note! Do not submit your files as a zipped folder. Upload all your files separately. If your file size is too big, consider optimising images, audio and transitions used to reduce the file size. The file size limit is 500MB.

Learning Outcomes

- Evaluate critically existing literature, research design and methodology for the chosen topic, including data analysis processes.
- Produce and evaluate critically a research proposal for the chosen topic.

Turnitin Originality Check

Before submitting your assignment, it is important to check the originality of your work by submitting your assignment to [Turnitin](#).

By submitting your assignment to this tool you will receive an originality report which can be used to check that you have not included other authors work without correct citation. It is important to note that submitting your work to the Turnitin Originality Check tool does not count as a submission of your final work. You must still submit your assignment below.

Academic Integrity and Plagiarism

We take academic integrity very seriously. Academic integrity means acting with fairness and honesty, giving credit to others where you are referring to their ideas or research and respecting the work of others. Plagiarism is defined as: 'Using or copying the work of others (whether written, printed or in any other form) without proper acknowledgement'. Before you finalise your assignment take time to check that all your statements are backed up with supporting evidence, that all sources you use - whether referring to their ideas, quoting directly or paraphrasing - are correctly referenced in the text. Correct use of referencing acknowledges the academic whose work has inspired you and helps the reader to find the sources you have used and demonstrates your ability to find and analyse relevant information.

Failure to properly acknowledge the work of others is an academic offence and may result in your work incurring a penalty or, in the most serious cases, you being removed from the course for academic dishonesty.

If you are unsure about referencing or plagiarism there are useful resources available in the Study Skills Hub which is accessible from the menu on the left hand side. If you are still experiencing difficulties with academic integrity then you can [contact the Study Skills Team](#) for individualised support.

Submission Instructions

- Submit your presentation and audio transcript below before the end of Unit 10.
- After the deadline, the submission page will be locked.
- Use UoEO Harvard referencing throughout.
- If you need to apply for Late Submission, please complete the [late submission of coursework form](#).

Feedback comments	1. Knowledge and Understanding of the Topic You show a strong understanding of the UAE's digital health system. You highlight the move from paper records to connected digital systems. 2. Presentation and Communication Skills You explain the importance of the project very clearly. Phrases like moving from fragmented, paper-based documentation help the audience see the before and after of your research. Focusing on a narrated transcript shows you have thought carefully about pacing the 15-minute presentation. 3. Criticality You show good critical awareness by pointing out that, while these systems are often seen as "inherently beneficial," the actual evidence in the UAE is still inconsistent. This is a thoughtful observation. Your plan to use the Mixed Methods Appraisal Tool (MMAT) shows strong academic rigour in evaluating the quality of existing research. 4. Structure and Presentation The presentation is very well-organized. The slides move smoothly from context to motivation and then to a clear methodology. The visuals are consistent, and the UAE HIE Integration footer keeps the theme clear throughout. 5. Use of Relevant Sources Using local policies and recent 2023–2025 sources shows your research is up-to-date with the region's healthcare goals. To improve your proposal, you could talk more about the human side of system failure. For example, why clinicians might resist using a unified record or why data silos might still exist despite the technology. This would show deeper, more thoughtful analysis. Some slides, like slide 2–4, have too much text because they show the full transcript. You could separate the transcript from the slides. For an outstanding presentation, make the slides more visual—for example, use a UAE map to show how the health exchanges are connected. To make the presentation better, you could add a simple example or story. Showing how a patient's data moves from a clinic in Dubai to a hospital in Abu Dhabi would make the impact of your research clearer.
