Check your knowledge

1. Which of the following descriptions best fits Delta Lake?

- ☐ A Spark API for exporting data from a relational database into CSV files.
- ☒ A relational storage layer for Spark that supports tables based on Parquet files. ✓ Correct
- ☐ A synchronization solution that replicates data between SQL Server and SPark.

2. You've loaded a Spark dataframe with data, that you now want to use in a delta table. What format should you use to write the dataframe to storage?

- ☐ CSV
- ☐ PARQUET
- ☒ DELTA ✓ Correct

3. You have a managed table based on a folder that contains data files in delta format. If you drop the table, what happens?

The table metadata and data files are deleted.

✓ **Correct**

The table definition is removed from the metastore, but the data files remain intact.

The table definition remains in the metastore, but the data files are deleted.
